## PROFESSIONAL SUMMARY

Detail-oriented and analytical professional transitioning into Governance, Risk, and Compliance (GRC). Backed by 50.7 hours of rigorous hands-on cybersecurity and GRC training via Immersive Labs (spanning NIST 800-53 controls, OWASP frameworks, risk assessments, and audit logs) coupled with active software engineering studies. Leverages a robust background in highly regulated, client-facing operations (HIPAA compliance, CRM database management, contract administration, and complex vendor coordination) to support risk mitigation, policy enforcement, and compliance monitoring.

## TECHNICAL SKILLS & GRC COMPETENCIES

**GRC & Frameworks:** NIST SP 800-53 (Access Control, Risk Assessment, Incident Response, Audit & Accountability), OWASP Top 10 & API Security, Data Privacy Regulations, HIPAA Compliance, Security Policies.

**Security & Analysis Tools:** Splunk (Log Analysis & SIEM), Wireshark (Packet Analysis), Linux CLI (Bash, File Permissions, Ssh/Scp), Oracle VirtualBox, Kali Linux, Ubuntu, Windows Security Concepts.

**Development & Technical Stack:** HTML, CSS, JavaScript, Visual Studio Code, Git/GitHub, Network Security Groups, Firewalls, Virtual Networks.

**Administrative & Operational:** Microsoft Office Suite, Google Workspace, CRM Management (Salesforce, HubSpot), Technical Documentation, Project Coordination.

## TECHNICAL PROJECTS & LABS

### Immersive Labs GRC & Security Training Portfolio — Remote

*Continuing Professional Education (CPE) — 50.7 Hours / 199 Labs*

- **NIST SP 800-53 Controls Analysis:** Completed 20+ specialized modules covering security and privacy controls, risk assessment, configuration management, system integrity, access controls, and incident response planning.
- **Vulnerability & Threat Frameworks:** Explored the OWASP Top 10 web vulnerabilities, MITRE ATT&CK framework tactics, and the cyber kill chain to understand attack vectors and remediation strategies.
- **Log Analysis & SIEM Monitoring:** Utilized Splunk and Linux CLI tools to analyze web server error/access logs, parse security events, and validate SIEM outputs.
- **Network & Packet Security:** Conducted hands-on traffic analysis, TLS handshakes, and stream extractions using Wireshark and tcpdump.

### Software Engineering & Systems Security Projects (GitHub) — Remote

*Development & Secure Systems — github.com/veronicanj2003*

- Designed and analyzed secure application networks, implementing foundational network security groups and access controls.
- Developed web applications and documentation utilizing modern front-end tech stacks (HTML, CSS, JavaScript) with an emphasis on secure coding practices.

## PROFESSIONAL EXPERIENCE

**Realtor / Transaction Coordinator** **Oct 2019 – Present**

*LPT Realty (Ocala, FL), Remax Premier (Lady Lake, FL), eXp Realty (Franklin, TN)*

- Manage comprehensive contract lifecycles, real estate documentation, legal compliance, and sensitive client records while maintaining strict data accuracy across multiple CRM platforms.
- Coordinate cross-functional workflows and communications between lenders, title companies, and inspectors to ensure adherence to strict regulatory deadlines.

**Patient Support Specialist (Remote)** **Feb 2025 – Sep 2025**

*AbbVie*

- Handled inbound patient inquiries in a strict HIPAA-compliant environment, safeguarding sensitive health information and upholding organizational privacy mandates.
- Documented interactions meticulously within CRM platforms, applying standardized workflows and critical thinking under compliance guidelines.

**Medical Scheduler (Remote)** **Mar 2021 – Oct 2021**

*Map Communications*

- Managed multi-client scheduling pipelines for medical, legal, and corporate enterprises while enforcing strict HIPAA compliance standards for patient data protection.

**Business Manager** **Mar 2018 – Mar 2021**

*Jauregui Roofing and Construction L.L.C (Sparta, TN)*

- Oversaw daily operational compliance, billing workflows, bookkeeping (QuickBooks), payroll, and administrative record-keeping.
- Resolved customer issues and upheld rigorous service and safety standards with internal stakeholders and vendors.

## EDUCATION & CERTIFICATIONS

- **Software Engineering Certification (Expected Spring 2026)** – Frontend Simplified (FES)
- **Immersive Labs Continuing Professional Education (CPE) Certificate** – 50.7 Hours / 199 Labs Completed (NIST, OWASP, Incident Response, Linux, Splunk, Wireshark).
- **Associate's Coursework in Business Administration** – Motlow State Community College, McMinnville, TN
