Professional Summary

Career-changer pursuing software engineering with hands-on training in HTML, CSS, JavaScript, and Linux-based environments, including exposure to cybersecurity fundamentals (OWASP Top 10, Nmap, Splunk, incident response). Brings a decade of experience in business operations, scheduling, client relationship management, and remote work across deadline-driven environments. Seeking software engineering internships and part-time roles in customer service, scheduling, or operations where technical aptitude and professional experience both add value.
